Installing Mathcad Prime with a Floating license

© INNEO Solutions GmbH | www.inneo.com

What is a Floating license:

• License server software with license file installed on server machine

That's IT

- Client software can be installed on any number of machines
- Only number of licenses in the license file can run at the same time on client machines

Information on how to get the latest license file can be found on the INNEO support page:

- See the document on how to set up a PTC account if you do not have one
- See the document on how to request the latest license file
- See the document on how to install and set-up FlexNet on a license server
- You must already have a PTC account, retrieved your license file and installed FlexNet before continuing with these instructions (make a note of the license server Host Name).
- Use the following link to get to any of the support documents listed above...

Installing Mathcad Prime with a floating license

Download the required version of Mathcad Prime on the <u>user</u> <u>workstation</u> from the PTC website using the link below

<u>PTC Software Download – MathcadPrime</u>

Download and unzip
